

S.T.R.O.M.

Security Tracking Reporting Online Manager

It is at this time that we are pleased to introduce the re-launch of S.T.R.O.M. a SECURITY TRACKING REPORTING ONLINE MANAGER. As an industry provider of security guard services we continuously seek solutions that will improve and complement the daily function of on-site security staff. Our collaboration with a program development team has resulted in this unique solution that will provide a tool to both y managers and security guards to report, track and maintain files in any reporting environment. It also addresses the important issue of protecting our environment, thus being a “Green Solution”.

“A simple reporting/tracking security solution”

What is S.T.R.O.M.?

S.T.R.O.M. is a simple security solution that provides the tools necessary to report and track activities related to functions performed at any security station, thereby eliminating the use of pre-printed reports and reducing cost.

The program will include (customization is available):

- Daily, Incident & Fire Alarm Report Tracking
- Shift Notes & Memo Creation
- Parking Control & Permit System
- Resident Database Management
- Instant Messaging
- Remote Access for Management
- Key & Parcel Logs
- Email Notification of Created Reports
- Resident Module

How Does S.T.R.O.M. function?

S.T.R.O.M. has been developed using Linux Technology to provide a stable and secure operating system. A designated URL or host address will be created for each client. In order to use S.T.R.O.M. you simply require a computer and Internet connection. No downloads, no installation. Your specific location profile will be created by our Support Team and once completed, your specific URL will be sent. We do the work. Simply log into the site and start using S.T.R.O.M. Data backups are scheduled throughout each day both on and off site under stringent security encryptions. There is no third party hosting or outside servers used. Your information is secure and confidential. It is that simple.

Why choose S.T.R.O.M.?

Unlike other products offered today, S.T.R.O.M. has been designed based on the knowledge and expertise of an industry leader of security guard services with over 25 years of experience. It is a program designed by security guard professionals with first hand practical knowledge of the challenges encountered on a daily basis by front line employees.

There are several packages available, based on your specific needs. Technical support is included during the hours of 9am - 5 pm and with additional email support available.

If you would like to demo this software and /or arrange a telephone conference, please call 416-222-7144 or email lmorris@wpsl.ca to receive/arrange a temporary username and password to log in to our demo site at <http://demo.stromsoftware.com>
